PERSONAL SUMMARY

With over five years in Data Analytics, Business Intelligence and Data Product Management, I have experience in developing data products and solutions that make analytics operational, scalable, and accessible. Notable achievements include building and leading data teams, developing strategies that maintain effective data governance and creating processes that establish a data culture with a strong focus on data reliability, process automation, and system efficiency. I am Passionate about applying data-driven methods to enhance performance, sustainability, and reliability within large-scale systems such as enterprise data environments. Additionally, I offer support and training to all stakeholders on how to access and interact with the data products created with ease. My goal is to contribute technical expertise, innovation, and leadership in a fast-paced environment.

CORE SKILLS

Data Pipeline Management | Process Automation | Data Governance | Cross-functional Collaboration | Dashboarding & Visualization | Performance Monitoring | Data Quality Management | Team Leadership | Problem Solving | Stakeholder Communication

TECH STACK

Visualization tools: AWS QuickSight, Power BI, Tableau, Looker Studio, SPSS.

Processing (ETL) tools: Python, SQL, Excel.

Collaboration tools: Confluence, Jira, Slack, GitHub, Microsoft Teams, Google (Docs, Sheets, Slides).

CRM tools: HubSpot.

WORK EXPERIENCE

SAMLEX INVESTMENTS

2023 Sep -2025 Sep

Business Intelligence Analyst Consultant (Part time)

- **Operations Analytics** - Weekly reporting improved efficiency by 30% within two months, by identifying key inefficiencies and providing insights and recommendations for improvements.
- **Cost Analysis** - Monitored real-time financial data, tracking operational costs, and highlighted cost-saving opportunities.
- **Schedule analysis and optimization** - Analyzed project schedules for cost efficiency, optimizing resource allocation and timelines.
- **Subcontractor performance analytics** - Identified data gaps when working with subcontractors, created systems and structures for better tracking and data verification, thus improving overall project performance.

MARKETFORCE TECHNOLOGIES LIMITED

2022 Jan -2023 Jul

Data Product Manager

- **Data Management** - Managed a team of six data professionals to maintain end-to-end data lifecycle for a B2B Fintech and FMCG retail distribution company. Analyzed sales, products, customer behavior, inventory, and credit-related insights to enhance operational efficiency.
- **Reporting** - Led the creation of performance dashboards for stakeholders, including C-Suite and investors, tracking KPIs such as revenue, sales growth, customer acquisition and retention metrics.
- **Automation** - Reduced manual reporting by 90%, speeding up data analysis and improving the team's ability to respond to external queries regarding business metrics.
- **Stakeholder Collaboration** - Partnered with different departments, such as finance and operations teams to ensure the accuracy of financial and operation insights. Supported fintech investment decisions with data-backed recommendations.
- **Product Management** - Supervised data engineers in designing and maintaining scalable pipeline architecture using AWS Redshift and Glue. Approved data engineering tools such as AWS Redshift and Glue, based on the tool capabilities and department's budget.
- **Team Management & Development** - Developed KPIs and growth plans for team members and participated in recruitment and onboarding processes. Delegated tasks to team members and paired them as per their strengths and weaknesses, to support their learning and development goals.

Data Analyst and Key Account Manager**2020 Mar -2021 Dec**

- **Account Management** - Single-handedly managed the company's biggest client, a credit company, that subscribed to our B2B Sales Force Automation (SFA) system to track credit products. Handled client's day-to-day product related queries such as new product feature requests, product customizations and bug reporting.
- **Stakeholder Collaboration** - Collaborated with developers to resolve over 80% of the bugs within 24 - 48 hours, ensuring the core business operations of the clients continued to run successfully.
- **Data Quality Management** - Led the team in significantly improving the quality of the data structure, identifying and cleaning data errors such as missing data fields and inaccurate data. Eliminated 80% errors to improve data accuracy in the data analysis phase.
- **Streamlining Processes** - Created standard operating procedures (SOPs) for streamlining data processes, maintaining data integrity and updates. Trained end-users on best practices for data entry to reduce errors and eliminate data inconsistencies.
- **Reporting** - Delivered over 95% of data requests on time by building dashboards to showcase the business KPIs performance using Excel, Google Sheets, Google Slides and Looker. Collaborated with leadership and departments such as Customer Service and Marketing to provide insights on monthly sales revenue, active customers, stock availability.

ADBUD LIMITED**2022 Dec -2023 Feb****Lead Data Consultant (Part time)**

- **Data Management** - Advised and created the SOP for data management processes for a B2B marketing agency offering data-driven media campaigns, creative solutions, and advertising services.
- **Reporting Automation** - Designed & created the data pipeline, that involved creating a database for data storage, setting up connections on the data pipeline to extract, transform and load the raw data.
- **Data Insights** - Reported brand campaign KPIs related to measurement & attribution, market research and audience insights. Improved the ongoing media campaigns' performance by making data-driven, strategic business decisions such as reworking the media budgets, updating the geo location, and applying strategic CPC & CPM bidding.

SARACEN MEDIA LIMITED**2019 Feb -2020 Feb****Data Analyst**

- **Analysis and Reporting** - Solely performed data analytics for a B2B communications agency focusing on Media Planning, Media Buying, and Digital Media, to support client's growth by creating valuable relationships between people & brands through Data, Technology/Innovation and Design Thinking.
- **Data Insights** - Captured actionable data insights from ad campaigns to inform investment approaches for the clients. Partnered with media planners and brand managers to provide prioritized areas of growth for brands based on market trends, customer needs and client's growth drivers.
- **Cost-Benefit Analysis** - Tracked performance KPIs that informed brands on the best advertising channels to invest in, appropriate time to invest and the most cost-effective approach that would deliver optimum ROI on their media spends.
